

Abort67 - stop harassing women outside a London abortion clinic

SIGN OUR PETITION [HERE](#)

Abortion Rights believes that women should be able to access information and abortion services free from intimidation and harassment so that they can make their own decisions on the termination of their pregnancy.

Abort67 appear to be trying to shut down these services by intimidating staff, service users and local residents.

'We the undersigned support the provision of local abortion services for women across London.

We are appalled by a campaign by anti-abortion extremists - and Abort67 in particular - who are systematically attempting to prevent NHS-funded abortion services being available to local women in Southwark.

We condemn those who protest outside abortion clinics showing graphic images of aborted fetuses, with the intent to intimidate and harass women as they access advice and support about an unplanned pregnancy, or a pregnancy they cannot continue with.

We believe that women should be able to freely access abortion services and their private choices should be respected.

We feel that having banners waved in their faces or being confronted by those who know nothing of their circumstances is harassment.

Healthcare providers should be able to offer women support and care free from intimidation.

One in three women will have an abortion in her lifetime. We stand by the women of London who will need that care and the doctors and nurses who provide it.'
